

REGENESIS[®]
REMEDICATION SERVICES

Industry Leaders in Applying Remediation Technologies

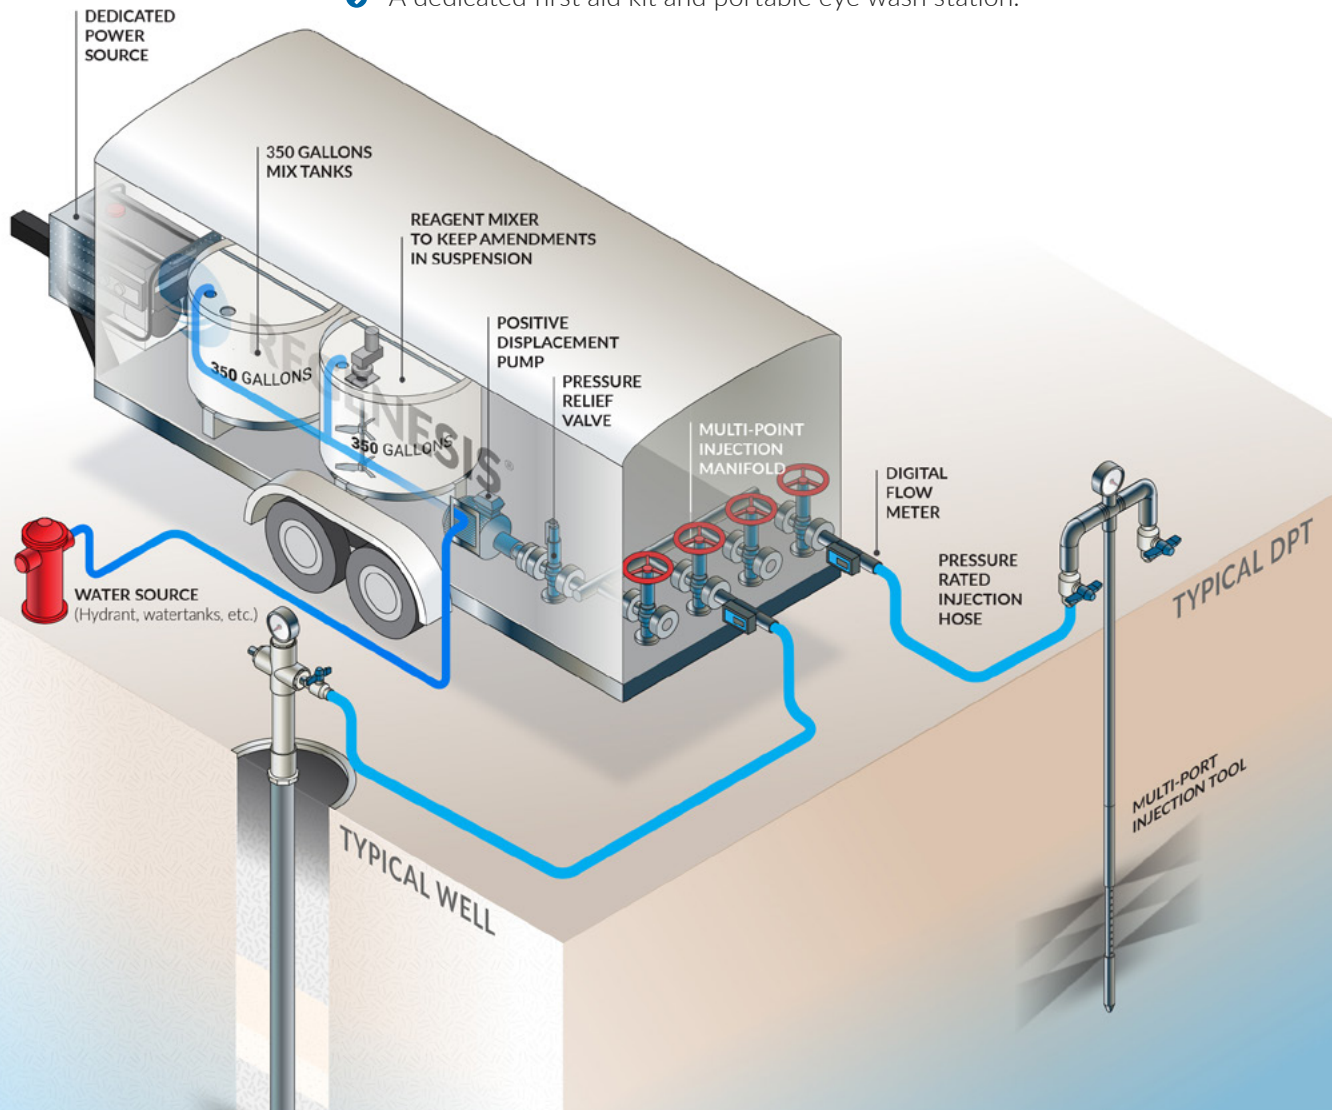

Typical Injection Setup

REGENESIS Remediation Services (RRS) injection trailers are manned by experienced field scientists and mobilized to every site equipped with:

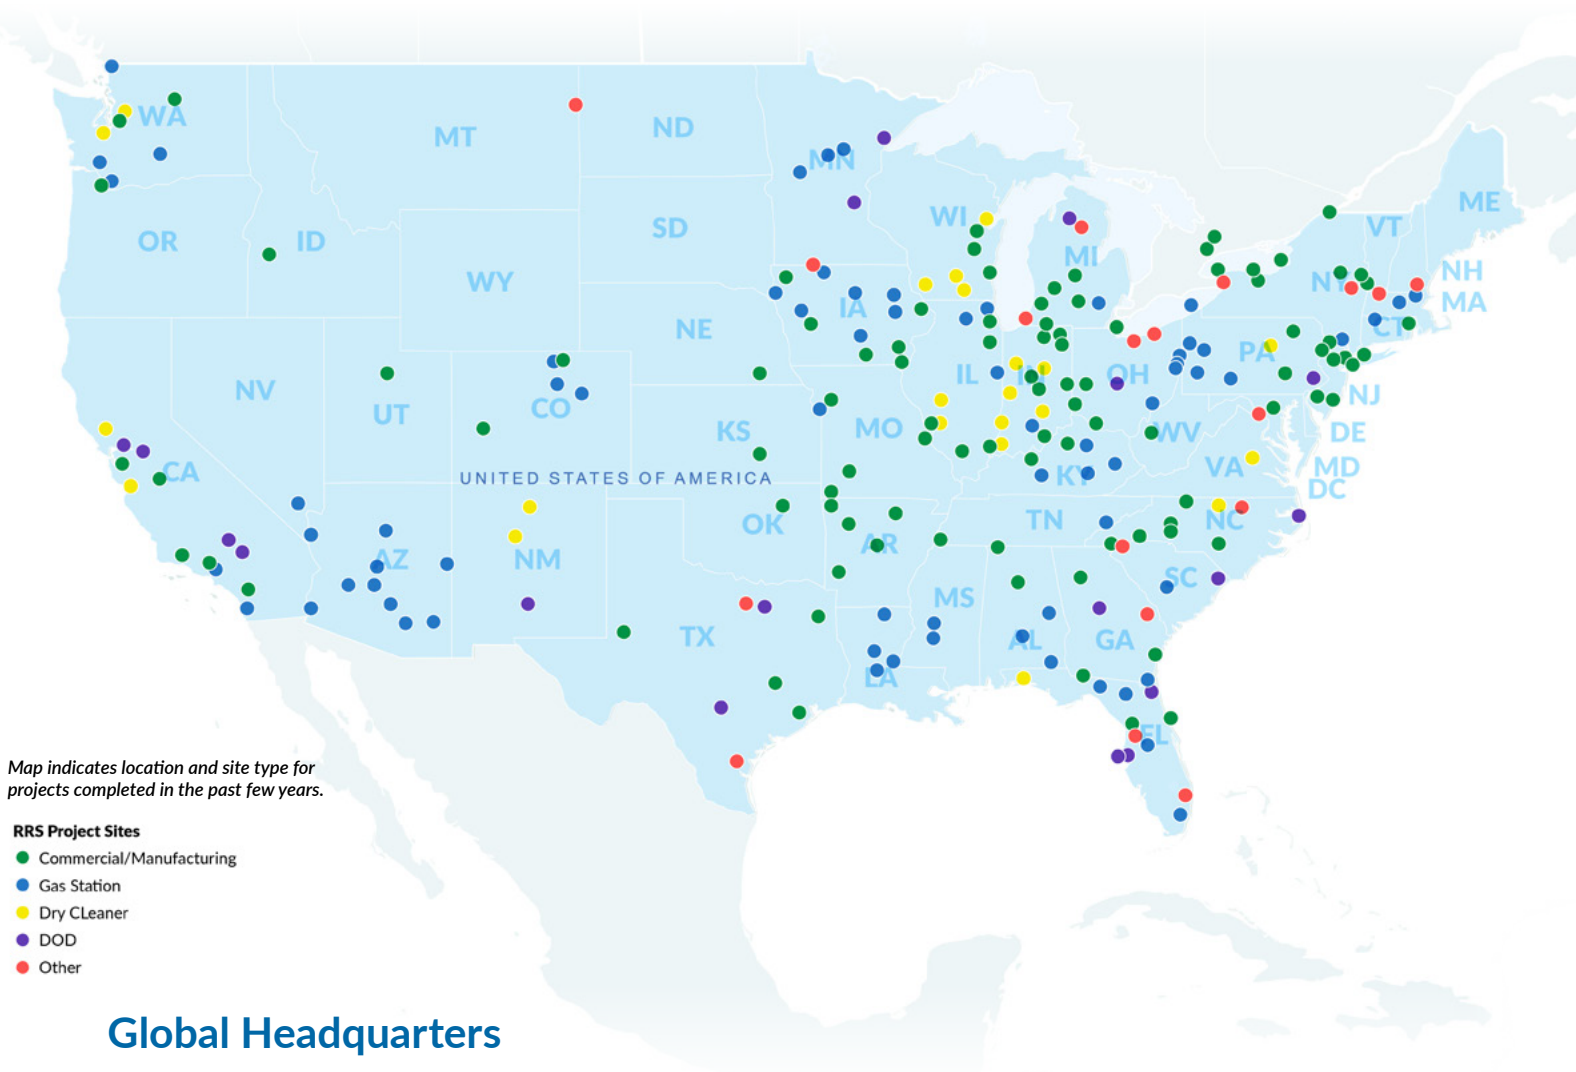

Overhead view of injection trailer dimensions

- ➔ A positive displacement injection pump (or similar), capable of producing at least 20 gallons per minute in flow.
- ➔ An onboard power source.
- ➔ Interior manifold system.
- ➔ Two 350 gallon mixing vessels.
- ➔ Transfer pumps and various other components to properly transfer and meter product from exterior containers to the interior mix tanks.
- ➔ Flowmeters and pressure gauges to ensure the accuracy and safety of all injections.
- ➔ A dedicated first aid kit and portable eye wash station.

Over 100 Projects Completed Annually Across the US

With decades of application experience, our Field Service Team is strategically located across the country to mobilize and assist on a wide range of sites throughout the US.
